

# Taos County Judicial Complex

Taos, New Mexico

## PROJECT SUMMARY

### TAOS COUNTY JUDICIAL COMPLEX

Taos, New Mexico

**CONTRACT VALUE**  
\$328,000

**COMPLETION DATE**  
April 2011

## AUDIO VISUAL SYSTEMS OVERVIEW

- Engineering
- Hybrid Digital Media and Analog System
- Two-Stage Presentation System Distribution
- All Digital Transport
- Touch Panel Control of Entire System

## Overview

Image Audiovisuals recently worked with the Taos County Judicial Complex staff, located in Taos, New Mexico, to provide a complete audio visual solution for the facility's two district courtrooms, two magistrate courtrooms and one commissioner's chambers. The audio visual solution included sound

reinforcement, audio and video presentation and touch panel control. The process was designed and integrated by Image Audiovisuals' staff of certified Biamp and Crestron engineers.

From conception to completion, Image Audiovisuals' skilled team members collaborated with the general contractor on the project and the end users (judicial and county staff as well as personnel from the Administrative Office of the Courts) to provide value engineering and concluded with coordination between the electrical, mechanical, and data/telecommunication contractors to complete the project ahead of schedule and on budget.

## Project Overview

- Hybrid digital media and analog system.
- Two-stage presentation system with judge and court staff control.
- All digital matrix routing is the heart of the system.
- All digital transport from the A/V presentation cart.

# Taos County Judicial Complex

Taos, New Mexico

## Commissioner's Chamber

- Five 65" flat panel displays with full HD and HDCP compliancy for the audience, including out-of-room feeds for overflow.
- All digital transport from the presentation cart.
- Individual monitors and microphones for each of the seven commissioners.
- Touch panel control of entire system.

## District and Magistrate Courtrooms

- Two 55" flat panel displays with full HD and HDCP compliancy for the gallery.
- 20" flat panel displays with full HD and HDCP compliancy for the judge, court staff, witness and attorneys.
- Up to seven flat panel evidence monitors for the jury.
- All digital transport from the evidence presentation cart.
- Microphones for key participants, including the judge, sidebar, court staff, attorneys, witnesses and the jury foreman.
- Expansion capability for a four channel digital record system and audio/video teleconferencing for remote depositions and arraignments.
- Touch panel control of entire system with override and admissibility control at the judge's location.
